AIA GROUP LIMITED – THIRD QUARTER 2013 NEW BUSINESS HIGHLIGHTS

AIA ANNOUNCES RECORD QUARTERLY RESULTS WITH VALUE OF NEW BUSINESS UP 26 PER CENT

HONG KONG, 18 October 2013 – AIA Group Limited (stock code: 1299) (the “Company”) today announced a record value of new business (VONB) for the third quarter ended 31 August 2013.

AIA’s successful profitable growth strategy continued to deliver:

- 26 per cent increase in value of new business (VONB) to US\$379 million
- 21 per cent growth in annualised new premium (ANP) to US\$839 million
- 44.7 per cent VONB margin, an increase of 2.1 percentage points (pps)
- Total weighted premium income (TWPI) growth of 14 per cent to US\$4,409 million

Commenting on the strong results, Mark Tucker, AIA's Group Chief Executive and President, said:

“We are pleased to report that AIA has delivered another excellent set of results in the third quarter with our highest-ever value of new business at US\$379 million. The outstanding increase of 26 per cent is a direct result of our ability to execute our proven growth strategy and builds on the very strong results we achieved in the first half of 2013. This performance reflects the consistent growth momentum AIA has delivered since IPO.

“Our third quarter figures again demonstrate the powerful combination of AIA's advantaged position as the largest independent pan-Asian life insurance company and the substantial progress we are making as a standalone, dynamic Asian company; a journey that began three years ago.

“We will continue to capitalise on AIA's key competitive advantages by improving the productivity and quality of our distribution platforms, launching innovative new products, and leveraging our financial strength and leading regional brand position to meet the vast and growing savings and protection needs of our customers. We are confident that AIA's significant future growth opportunities combined with the successful execution of our strategy will continue to generate sustainable value for our shareholders.”

SUMMARY FOR THE THIRD QUARTER

VONB increased by 26 per cent to US\$379 million compared with the third quarter of 2012, as we continued to optimise both new business volume and margin to deliver sustainable growth.

Each of our geographic market segments delivered double-digit growth in VONB over the quarter building on the very strong performance in the first half of the year. Highlights of the quarter include the ongoing positive momentum achieved by AIA in Hong Kong and China, the excellent growth from our Philippine and Indonesian businesses and sustained improvements in our Korean operation.

AIA delivered a strong increase of 21 per cent in ANP to US\$839 million in the third quarter. VONB margin improved by 2.1 percentage points to 44.7 per cent compared with 42.6 per cent in the third quarter of 2012. Margin expansion was achieved mainly through a positive improvement in product mix.

AIA's proprietary agency channel accounted for 71 per cent of VONB in the third quarter and was a key driver of the overall VONB growth. The successful delivery of our Premier Agency strategy continued with growth in both the number of active agents and agent productivity in the third quarter. We continued to review our agency compensation structure in Thailand, as previously highlighted in our interim results announcement. Partnership distribution also reported solid growth, benefiting from strong bancassurance and group insurance results and the ongoing restructuring of our direct marketing channel in Korea.

TWPI increased by 14 per cent to US\$4,409 million, compared with the third quarter of 2012.

OUTLOOK

Macroeconomic fundamentals in Asia remain robust. Debate over the timing of supportive U.S. monetary policy caused capital market volatility in the third quarter and tested those countries running current account deficits. Asian central banks responded appropriately, as they have the ability and resolve to continue to respond proactively to global liquidity challenges. The larger Asian economies continue to benefit from rebalancing toward domestic sources of growth, while more trade-dependent economies should benefit from a pick-up in global trade emanating from a more positive economic outlook in China and Japan.

Demographic drivers remain strong and we are confident in the immense growth potential for life insurance in Asia. The substantial upside from low insurance penetration, rapid urbanisation, increasing household incomes and the opportunity to reduce the substantial savings and protection gaps across the region will continue to provide AIA with significant growth opportunities. AIA's strong performance since the IPO in 2010 demonstrates the success of our strategy and our advantaged position in the region. We are exceptionally well-positioned to benefit from the expanding demand for our products and services to create sustainable value for our shareholders.
